

Chlorella

Significant Stimulating Effects on the Immune System

The immune system is our first line of defense against disease, both infectious and degenerative. When the body is weak, mild diseases such as colds and flu, as well as more serious diseases gain a foothold. Studies have indicated that Chlorella can have a significant stimulating effect on the immune system. Chlorella contains 180 mg of beta-carotene in each 100 grams. Beta-carotene potentiates Vitamin A activity and antioxidant activity, which assists in lowering the free radical burden in the body.

Protection Against Free Radical Damage

Chlorella, as an antioxidant protective substance, may protect cells from the carcinogenic effect of free radical damage. Chlorella supplements, with their broken cell walls, can speed up the rate of cleansing in the bowels, bloodstream and the liver, by supplying the highest yield of any other food source.

Chlorella, a fresh water Green Algae, is a natural source of CGE (Control Growth Factor) and contains all the essential amino acids of protein which can be especially beneficial to children and women who are in their child bearing years.

Myrna Jo Heller, AMS' Vice President of Nutrition and Product Support, is a fitness and weight management expert with a graduate degree in education. As a much sought out public speaker, Myrna Jo travels all across the country speaking about her favorite subject, "Health is a Bargain at Any Price!"

Myrna Jo and her close personal friend, Dr. Joseph C. Lee, M.D., Ph.D., a world renowned educator and scientist, are credited with introducing Chlorella to the Western Hemisphere. Dr. Lee was educated in China and Canada and has been instrumental in the careers of thousands of Asian and American medical and dental practitioners for over 30 years. It was through their common desire for a nutritious, high energy food source that their partnership and journey began.

Chlorella

Nature's Perfect Food

Remarkable Chlorella

Chlorella, a single cell nutrient, is so tiny that it can only be seen under a microscope yet offers many health benefits to all of us. Chlorella has developed into one of the finest health food supplements available. Chlorella was originally investigated for its potential in helping to solve the world hunger problem because of its high protein content and its ability to produce its protein about 50 times more efficiently than other protein resources such as fish, cheese, eggs, meats, etc.

The Power of Chlorella

Chlorella has a long list of health benefits, including:

- Supplies the body with vital minerals, vitamins, and protein
- Enhances the immune system by stimulating the body to make more interferon
- Stimulates growth of beneficial bacteria in the bowel
- Promotes better digestion
- Increases long-term energy
- Gently detoxifies the system

Chlorella is also rich in magnesium, which is a mineral that is important to the function of every cell in the body.

*Note: AMS Chlorella is grown and harvested in pure, fresh water specifically for human consumption.

Nature's Perfect Food

Chlorella is nature's first and most perfect food. It contains all the essential amino acids of protein, RNA & DNA nucleic acids, fiber, vitamins and minerals, as well as many other nutrients. 100% pure Green Algae Chlorella assists in detoxifying the excesses in our system. It is particularly beneficial for those who have a greater need for quality proteins and certain vitamins and minerals.

The Impressive Contents of Chlorella

Chlorella is almost 60 percent protein, and contains all 11 essential amino acids, important vitamins and minerals.

- | | |
|--------------------|--------------|
| • Vitamin C | • Vitamin K |
