

Shark CARTILAGE Complex

for maximum joint and bone health

For best results, use with Nature Flex™ and MSM Complex™.

The Secret Behind the Science

Every day, people wake up to excruciating joint pain. Amazingly, we look to one of the earth's oldest and most feared creatures to relieve symptoms of many of our most devastating degenerative and inflammatory conditions.

Having survived virtually unchanged, the shark appears to be the only creature with a natural immunity to cancer and practically every condition known to man. Scientists now believe it is the shark's cartilage skeleton which is responsible for this super immunity. What makes it so special is that it contains mucopolysaccharides (lubricating substances absent in people with connective tissue disorders) in a concentration one thousand times greater than found in any other type of cartilage.

Three Other Essential Ingredients

Three other essential ingredients (in addition to Shark Cartilage) in AMS's powerful complex--Curcumin, Boswellin, Vanadium-- make it one of the most powerful, all-natural products on the market.

1. **Curcumin** is recognized for its broad biological protective activity and safety of use. Curcumin possesses strong antioxidant properties that inhibit the formation of free radicals (highly toxic and destructive molecules) in food and body tissues and neutralize already-formed free radicals.

2. **Boswellin** has been found to be effective in reducing pain and stiffness, and improving grip strength and physical performance. It also improves blood supply to the joints and promotes joint health.

3. **Vanadium** is a building material for bones and teeth, which makes it highly valued by athletes who claim that it increases their energy levels and endurance.

Historical Benefits at a Glance:

- ✓ Fights free radical damage
- ✓ Reduces pain and stiffness
- ✓ Improves physical performance
- ✓ Builds strong bones & teeth
- ✓ Increases energy and endurance
- ✓ Improves grip strength
